SEARCH BY FINGERPRINTS ON THE PUBLIC PORTAL

OVERVIEW
Pure Research Management System (Pure RMS) uses a fingerprint to facilitate collaboration between people. This guide explains how to search for fingerprint terms and abstracts using the Pure RMS portal.

PROCESS

1. Navigate to Pure Portal
2. Navigate to search page
3. Enter search terms or abstract
4. Refine the search
5. View search results

STEPS
2. Click the gear icon next to the search bar and select Copy/paste text – find expertise.
3. Enter your search terms in the text box and click **Analyze text & identify concepts**. Alternatively, sections of text, such as an abstract, can be entered into the search area and the fingerprint analysis performed on that text.

4. Refine the search results by choosing the area of research, under **Research Domain**, and then select the individual fingerprints which are relevant to your search.

5. View the search results. There are options to view profiles of academics with matching fingerprints from only their last five and ten years of work or their entire portfolio.
