

# Welcome

## Programming Languages Research Group

The Programming Languages Research Group (PLRG) is part of the [Department of Computing](#) in the [Faculty of Science](#) at [Macquarie University](#).

PLRG conducts research in all aspects of modern programming languages and systems. We focus on research that builds on theoretical foundations to construct real world software systems. These interests encompass: programming language theory, design and implementation; tools and environments for programming languages; and program specification and verification.
